Hybrid wolves still in the wild

A pair of escaped animals roams front, may have been seen.

MICHAEL BABCOCK Tribune Staff Writer

Two of these wolf hybrids that escaped a sanctuary in Blackfoot, Montana, have been reported by game wardens throughout the state.

The hybrids were escapees from the Wolf Sanctuary in Blackfoot, Montana, which is located near the Blackfoot Indian Reservation.

Game wardens have been tracking the hybrids since they escaped last month.

The hybrids are described as being similar in appearance to domestic wolves, but with some characteristics of coyotes.

Officials are urging people to stay away from the hybrids and report any sightings to authorities.

Hybrid wolves are considered illegal to harbor in Montana.

The hybrids are believed to be part of a larger population of hybrid wolves that have escaped from sanctuaries around the country.

Hybrid wolves are created by breeding domestic wolves with coyotes, and are believed to be more adaptable to human environments than pure wolves.

The hybrids are also believed to be more aggressive than pure wolves, and can be dangerous to humans.

Game wardens are urging people to keep a safe distance from the hybrids and report any sightings to authorities.
