Join NGO, government, industry, and faculty leaders in discussing grand challenges in community and environmental health and safety as part of sustainable resource development in developed and developing nations

Who should attend: Faculty, researchers, graduate students interested in developing solutions for community and environmental health and safety protection in areas of natural resources development

Outcomes: Defining major challenges for research and education
Networking, establishing research collaborations
Curricula to address education needs

Presentations: Industry, NGO, and government leaders, faculty, and graduate students (if you are interested in presenting contact Mary Poulton at mpoulton@email.arizona.edu)
